

**FOR IMMEDIATE RELEASE**

**Nevada PTAC, Procurement Outreach Program receives APTAC's 2020 Outstanding Project Award**

**Gallatin, TN March 30, 2020** - The Association of Procurement Technical Assistance Centers (APTAC) presented its 2020 Outstanding Project Award to the Nevada Procurement Technical Assistance Center (PTAC) for their ten-page checklist document entitled, "A Checklist of Risk Mitigation Tips for PTAC Clients Pursuing Firm-Fixed-Price (FFP) Professional Service Contracts."

Knowing and applying the mantra, "sharing is caring," the statewide Nevada PTAC Team, mindfully collaborated and generated a ten-page checklist document entitled, "A Checklist of Risk Mitigation Tips for PTAC Clients Pursuing Firm-Fixed-Price (FFP) Professional Service Contracts." The Nevada PTAC not only taught a webinar about the tailorable checklist document to PTAC clients because FFP government contracts can either make or break a company, the team also hosted the APTAC 2019 Spring Conference in Reno, NV in March.

APTAC's Outstanding Project Award recognizes an accomplishment that stands out from the usual activities that all PTACs organize and undertake. The award is given to projects that benefit all APTAC members and/or serve as a model for other PTACs to emulate. Nevada PTAC's proactive and innovative project to create a valuable resource that can be used by all represents just such an initiative.

APTAC is the professional organization of and for the 94 Procurement Technical Assistance Centers (PTACs) sponsored by the Defense Department's Defense Logistics Agency and local host organizations. APTAC supports the PTACs by providing them critical updates on the ever-changing procurement processes across all federal agencies; comprehensive training opportunities and certification; and a national presence to collaborate with federal agencies on small business contracting initiatives and otherwise provide a voice in national government contracting assistance and policy arenas.
