Roadmap to Recovery for Nevada

Agriculture

Mandatory*

Recommended Best Practices*

Employees

- Face coverings are required inside facilities and for any interaction where a 6 feet distance is not possible.
- Provide disposable gloves to employees in manufacturing facilities and indoor operations.
- Employers must perform daily symptom assessment of employees.**
- Require employees to stay home if symptomatic.
- Require frequent and thorough hand washing, including providing workers, customers, and worksite visitors with a place to wash their hands. If soap and running water are not immediately available, provide alcohol-based hand sanitizer.

- Provide hand sanitizer stations.
- Take temperatures of employees daily and/or ask screening questions for COVID-19.
- Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic.

Shift Patterns

- Alternate end-of-day shift changes for social distancing for large operations.

- Provide hand sanitizer stations.
- Consider staggered shifts to ensure minimum 6 feet between people.

Shared Spaces/ Workstations

- Ensure minimum 6 feet between people; if not possible, install barriers.
- Regularly disinfect all high touch surfaces inside facilities and shared agriculture equipment between uses by different employees.
- Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinetry handles, appliance handles, toilets, countertops, phones, tables, etc.).
- Do not use communal water fountains.

- Encourage employees to disinfect their workstations, if applicable, regularly.
- Establish a regular cleaning schedule.
- Limit congregation in shared spaces.
- Divide essential staff into groups and establish rotating shifts.
- Close lunch rooms, breakrooms or other gathering spaces, if they exist, or conduct regular cleaning.

Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures. Employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on [EPA List N](#).

- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

**These recommendations were compiled based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), [Nevada OSHA](#), and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*

****Daily symptom assessment should include monitoring for fever, cough and trouble breathing.**
