NEVADA JOBS AND UNEMPLOYMENT

Nevada recorded 1,550,000 jobs in July, a gain of 3.8 percent from the prior year. The most recent figures represent a gain of 105,800 jobs over the pre-pandemic high. Nationally, employment grew just 2.2 percent over the year in July.

Nevada's unemployment rate stood at 5.3 percent in July, down a tenth of a percentage point from the prior month to reach the same rate as July of 2022. Rising labor force participation suggests that more Nevadans are returning to the workforce, which puts upward pressure on the unemployment rate as they search for work.

ECONOMIC DEVELOPMENT TARGET SECTORS: REALIZING NEVADA'S ELECTRIC, INNOVATIVE, AND CONNECTED FUTURE

In March 2023, GOED released its new 5-Year Comprehensive Economic Development Strategy, titled "Realizing Nevada's Electric, Innovative, and Connected Future". Among these are five primary economic development target sectors:

- » Advanced Manufacturing
- » Transportation & Logistics
- » Information Technology
- » Natural Resources & Technology
- » Hospitality, Tourism, Sports, & Creative Industries
