Company Profile

Nuro, Inc. (Nuro) plans to establish an Autonomous vehicle testing site and endof-line manufacturing facility in Las Vegas. The company was founded in 2016
with the goal of harnessing the power of robotics and artificial intelligence to solve
challenges at a global scale. Nuro produces a self-driving vehicle made for local
goods transportation and was the first company to receive an autonomous
exemption from the National Highway Traffic Safety Administrations. The
company anticipates filling the Nevada facility jobs from local labor pools and local
universities. Today the company is one of the leading autonomous delivery
companies, committed to using the power of technology for the greater good.
Nuro was been named the #1 Most Promising AI company in the US by Forbes,
the Consumer Technology Association's start-up of the year 2020, and a 2020
top start-up by LinkedIn. The company also considered California, Texas, and
Arizona as potential locations for the project. Source: Nuro, Inc.

IMPORTANT TERMS & INFORMATION

Tax Abatements are reduction or discount of tax liability and companies do not receive any form of payment.

Total Estimated Tax Abatement is a tax reduction estimate. This estimated amount will be discounted from total tax liability. **Estimated New Tax Revenue** is amount of tax revenues local and state government will collect after the abatement was given to applying company.

Economic Impact is economic effect or benefits that this company and it's operations will have on the community and state economy measured by total number of jobs, payroll and created output.

July 28, 2021

Mr. Michael Brown Executive Director Nevada Governor's Office of Economic Development 555 E. Washington Avenue, Suite 5400 Las Vegas, Nevada 89101

Dear Mr. Brown,

Nuro Inc. is applying to the State of Nevada for the Sales & Use Tax Abatement, the Modified Business Tax Abatement, and the Personal Property Tax Abatement. We request that Nuro, Inc. be placed on the agenda for the September 23, 2021 GOED Board meeting.

On March 31, 2021, tax abatements were approved for their testing facility and were a key factor in determining to locate in the state. This is not an expansion of the existing project, but rather a decision to locate a key aspect of their existing facility that is currently located outside the State of Nevada.

The project, in its entirety, will create a total of 250 new positions in the first 24 months of operations, with an average hourly wage of \$27.50. The company will make a capital investment of \$10,000,000.00

Nuro, Inc. meets and exceeds the three requirements for tax abatements. This application has the full support of the Las Vegas Global Economic Alliance.

Sincerely,

Michael Walsh

VP Economic Development

Las Vegas Global Economic Alliance

July 23, 2021

Mr. Michael Brown Executive Director Nevada Governor's Office of Economic Development 555 E. Washington, Ave., Suite 5400 Las Vegas, NV 89101

Dear Executive Director Brown:

By way of this letter and attached application, Nuro, Inc. ("Nuro" or "the Company") is requesting tax incentives to assist with a growth project located at two Clark County, Nevada locations. Nuro is a robotics company transforming local commerce through autonomous delivery. The Company develops and operates a fleet of self-driving vehicles intended to deliver local goods of all kinds, ranging from food to prescriptions. Nuro's service helps merchants deliver goods to customers quickly, affordably, and more safely. Led by world-renowned experts in robotics, artificial intelligence, computer vision, and product design, the Company began making deliveries to the public in 2018.

Nuro currently operates its autonomous vehicles in Arizona, California and Texas, and continues to expand commercial service with its primary service area located in Houston, TX. Through recent strategic planning, the Company would like to open an additional autonomous vehicle testing site and end-of-line manufacturing facility to prepare for commercial scale operations.

On March 31, 2021, tax abatements were approved for our testing facility and were a key factor in determining to locate in the state. Nuro has signed a lease agreement with a facility in Clark County that includes a closed-course testing track that will allow our autonomous vehicles to safely push the limits of their capabilities. We expect to invest over \$1.3 million in capital expenditures for this project and create over 50 new jobs. In addition to validation testing, we are also using this facility to train our teleoperation team to provide the redundancy required to launch our service at scale.

While pursuing this testing facility project, we have simultaneously been pursuing an interdependent aspect of the project that does not need to be located at the same site as the testing facility. Originally the facilities were conceived to be located on the same site. However, since we chose the closed course for the testing facility we needed to pursue additional locations throughout the Southwest U.S. since the closed course did not have the capacity to support the other facilities. Nuro ultimately concluded nearby locations offer several benefits, including overlap in personnel we plan to hire and testing and fabrication will happen at both facilities.

Nuro has identified a built-to-suit development opportunity near the closed course facility where we intend to develop a calibration and manufacturing line for our next generation robots. We expect this investment to bring an additional 200 jobs and approximately \$8-10 million in capital expenditures. This aspect of the project will be responsible for commissioning Nuro's custom autonomous vehicles,

including sensor assembly, calibration and a small verification course. The vehicles will then move to the testing facility.

This is not an expansion of the existing project, but rather a decision to locate a key aspect of our existing facility in the North Las Vegas area rather than out of state. We believe the respective activities at each North Las Vegas site are closely entwined and will greatly influence how we grow our organization in the future.

We fully expect the combined facilities to exceed the minimum thresholds and program requirements as established in the application and the tax abatements are a key factor in the decision to locate this facility in the state. We anticipate filling the new jobs from local labor pools and the project will result in the creation of direct and indirect jobs that will boost the local economy. In addition, these facilities will also help support the expansion of Nevada's growing technology sector.

A recent study by the transportation industry economists at Steer, "Economic Impacts of Autonomous Delivery Services in the U.S." found that autonomous delivery services like Nuro's could bring communities substantial economic and social benefits. Steer projects that from 2025-2035, Americans could use on-road autonomous delivery services like Nuro's instead of personal cars for much of their daily shopping and errands. This will:

Create new jobs: create and sustain 3.4 million jobs annually - from fleet operators and pick-pack workers in retail, to more technical software and hardware engineers. For comparison, there are currently 3.2 million public school teachers in the U.S. Additionally, Steer found that over 65% of the investment by the autonomous delivery services sector "goes towards compensation of employees in highly-productive jobs (i.e. jobs that create high value of economic activity per worker).

Stimulate local economies: generate \$1.1 trillion in investment from AV delivery companies, suppliers, and retail partners over the 10-year period, which will generate an estimated \$4.1 trillion in total value to the U.S. economy. That is more than the total \$3.5 trillion in economic activity from oil and gas extraction over the last decade. The key industries that will see this investment are retail, automobile manufacturing, electronic goods and equipment, utilities, warehousing and maintenance.

Reduce crashes: avoid 244,000 severe road collisions, which would reduce injuries by approximately 348,000 and help prevent an estimated 4,800 Americans from dying in car crashes. Preventing 4,800 fatalities, for context, would be comparable to saving the lives of all passengers on 22 Boeing 737s.

Decrease emissions: reduce CO2 emissions by 406 million tons. That would offset the emissions from powering every household in NYC, LA, Chicago, and Houston combined, for 10 years.

Give people time: save Americans 21 billion hours of driving to and from the store. That is the equivalent of every user recouping 1.5 hours every week.

The work at these facilities will be critical to enabling these broad economic and social impacts. These benefits will likely accrue first to the communities where testing, manufacturing, and commercial deployments of the technology takes place.

A major factor in the decision on where to locate this facility is cost. While the Company considers many factors during a site selection process, the potential value of tax incentives by jurisdiction will be an important factor to help offset the costs of the project. Nuro is seeking the most operationally efficient and cost-effective location to accommodate its business needs as the company plans for this large capital and hiring commitment. The incentives are a major factor in deciding where to locate this project.

Our experience with the representatives from the Las Vegas Global Economic Alliance has been positive, and we look forward to your consideration of our application to assist us with our efforts to expand in your state. If you have any questions, please feel free to contact me.

Thank you for your time and consideration.

Sincerely,

Mike Blank

Regional Policy Lead

Mr. Michael Brown Executive Director Nevada Governor's Office of Economic Development 555 E. Washington, Ave., Suite 5400 Las Vegas, NV 8910

RE: <u>APPLICATION FOR INCENTIVES - REQUEST FOR CONFIDENTIALITY OF RECORDS AND DOCUMENTS - NRS 231.069</u>

Dear Director Brown:

On July 23, Nuro, Inc. submitted an application to you as the Executive Director of the State of Nevada Governor's Office of Economic Development ("GOED") requesting approval of economic incentives for the new operation in Clark County, Nevada. The purpose of this letter is to request that any and all records and other documents in GOED's possession concerning initial contact with, research and planning for Nuro, Inc., including but not limited to certain information in that application, and if amended, all be kept confidential pursuant to Section 4 of Assembly Bill No. 17 (2015 Regular Session) as codified in NRS 231.069.

Please be advised that Nuro, Inc. specifically deems the following information proprietary and confidential:

- 1. Incentive Application Equipment List Schedule 5 (A)
- 2. Incentive Application Employment List Schedule 5 (B)

Thank you for your consideration. If you have any questions or require any further information, please do not hesitate to contact me.

Sincerely,

Mike Blank

Regional Policy Lead

Nuro, Inc.

ECONOMIC DEVELOPMENT

REQUEST FOR CONFIDENTIALITY DETERMINATION

Pursuant to NRS 231.069, and upon the request of applicant Nuro, Inc. the Executive Director of the Office has determined the:

- (i) The detailed schedule of Capital Equipment List, 5(A)
- (ii) The detailed schedule of Employment List, 5(B)

are confidential proprietary information of the business, are not public records, and shall be redacted in its entirety from the copy of the application that is disclosed to the public.

cinor a cinoc of Economic Bevelopment:

If Yes, list the program awarded, date of approval, and status of the accounts (attach separate sheet if necessary):

Nuro previously received Director-Level approval on March 31, 2021, and for transparency we are now seeking Board-Level Approval due to an increase in investment

Section 3 - Program Requirements

Please check two of the boxes below; the company must meet at least two of the three program requirements:

- X A capital investment of \$1,000,000 in eligible equipment in urban areas or \$250,000 in eligible equipment in rural areas are required. This criteria is businesses. In cases of expanding businesses, the capital investment must equal at least 20% of the value of the tangible property owned by the business.
- X New businesses locating in urban areas require fifty (50) or more permanent, full-time employees on its payroll by the eighth calendar quarter quarter in which the abatement becomes effective. In rural areas, the requirement is ten (10) or more. For an expansion, the business must employees on its payroll by 10% more than its existing employees prior to expansion, or by 25 (urban) or 6 (rural) employees, whichever is greater
- X In both urban and rural areas, the average hourly wage that will be paid by the business to its new employees is at least 100% of the average statewide hourly wage.

Note: Criteria is different depending on whether the business is in a county where the population is 100,000 or more or a city where the population is 60,000 or more "urban" area), or if the business is in a county where the population is less than 100,000 or a city where the population is less than 60,000 (i.e., "rural" area).

BRIEF DESCRIPTION OF CONSTRUCTION PROJECT AND ITS PROJECTED IMPACT ON THE LOCAL ECONOMY (Attach a separate sheet if necessary):

Nuro has evaluated real estate options as well as the employment pool available to meet specialized engineer positions as well as entry level positions. The project will call for hiring approximately 250 individuals during the initial part of the project. The investments in facilities will result in over \$10 million in capital expenditures, including machinery and equipment; furniture, fixtures, and equipment; IT equipment; and leasehold improvements. The Company anticipates filling these new jobs from local labor pools, and pulling from local universities, which will promote salary growth in the state. The project will result in the creation of direct and indirect jobs and will also serve as a boost to the local economic for the foreseeable future.

Utility infrastructure:	4	Business permitting & regulatory structure:	3	
Utility costs:	3	Access to higher education resources:	2	

Please summarize the importance of the abatement program to your decision (please include at least a paragraph summary):

A major factor of the decision on where to locate this facility is cost. While the company considers many factors in our site selection process, the potential value of tax incentives are a very important factor to help offset the costs of the project. Nuro is seeking the most operationally efficient and cost-effective locations to accommodate its business needs as the company plans for this large capital and hiring commitment. The incentives are a major factor in our decision making process and further growth in Nevada will be prioritized as the company continues to grow.
