

RENEWABLE ENERGY

# The Future Is Powered Here.

## Renewable Energy & Clean Technology in Nevada.

### Powered by the Sun, Driven by Innovation.

Nevada leads in utility-scale solar, geothermal, and energy storage – from the record-sized Gemini Solar+Storage project that came online in 2023 to long-term utility power purchase agreements (PPAs) and new transmission lines that guarantee market access for green power. Backed by robust state renewable portfolio standards and federal incentives, the Silver State’s clean energy boom is grounded in reliable returns.

#### Top Stats:

- Over \$10 billion invested in Nevada solar, geothermal, and energy storage projects since 2008
- 30+ foreign companies fueling Nevada’s renewable surge

#### Key FDI Highlights:

- Primergy (UK) / Quinbrook- \$1.2B Gemini Solar + Storage project near Las Vegas
- Enel Green Power (Italy), EDF Renewables (France), Korea Electric Power Corp.- large-scale solar and geothermal projects
- Ormat (Israel/US) - Geothermal leader with extensive Nevada operations

Join the global energy transition — plug into Nevada’s clean power momentum.

RENEWABLE ENERGY

# Clean Technology.

## Clean Tech Finds a Home in the Desert.

From solar component manufacturing to hydrogen fuel systems, Nevada is a launchpad for sustainability tech. Recent arrivals include India's Zetwerk (solar parts) and France's Air Liquide (hydrogen), joining homegrown innovators like Redwood Materials – all leveraging Nevada's pro-renewables policies and proximity to Western markets. If your clean tech scales with sun, storage or sustainability, Nevada is your market.

Sustainability efforts stretch across the state – from eco-conscious urban planning in Las Vegas to water conservation in desert communities. Nevada's natural beauty is matched by a deep dedication to protecting it for generations to come.

### Top Stats:

- \$2.5 billion to date in foreign clean tech investments anchored in Nevada.

### Key FDI Highlights:

- Air Liquide (France) – \$2.5 billion to date in foreign clean tech investments anchored in Nevada.
- Zetwerk/Unimacts (India) – Solar tracker components manufacturing expansion near Las Vegas
- SunBrush mobil (Germany) – U.S. branch in Henderson for automated solar cleaning systems
- H2 Innovation (Japan) – Hydrogen fuel systems firm launched in Las Vegas

If your clean tech scales with sun, storage, or sustainability – Nevada is your market.
