

Clean Technology.

Clean Tech Finds a Home in the Desert.

- The U.S. Department of Energy has tracked over \$10.5 billion in new battery and EV supply chain investment announced in Nevada
- Nevada ranks #1 in the nation for per capita solar generation -3.7+ GW of solar already generating statewide, with 8+ GW more in the pipeline
- 50% Renewable Portfolio Standard by 2030; 100% carbon-free by 2050
- Nevada is home to 9 of the 11 top geothermal firms in the U.S.
- Greenlink Nevada - 717 miles of new transmission lines, \$4.2B investment, unlocking up to 8 GW of new capacity, expected online by May 2027

Highlighted Projects

- **Primergy / Quinbrook (UK) - \$1.2B Gemini Solar + Storage project near Las Vegas**
- **Arevia Power, Libra Solar - 700 MW solar + 700 MW battery storage; \$2.3B+ investment; completion 2027**
- **EDF Renewables, Arrow Canyon - 275 MW solar + 75 MW battery storage on the Moapa Indian Reservation; completed 2023; powers 57,600 Nevada homes**
- **EDF Renewables, Bonanza Solar - 300 MW project proposed near Las Vegas in Clark and Nye Counties; in public comment/permitting phase**
- **Fervo Energy - Enhanced geothermal pioneer operating Corsac Station in northern Nevada; 115 MW PPA with NV Energy powering Google's Nevada data centers; \$462M Series E raised in 2025; on track to deliver 500 MW of 24/7 carbon-free power by 2028**
- **Ormat Technologies (Israel/U.S.) - Leading geothermal operator with extensive Nevada operations**

If your clean tech scales with sun, storage, or sustainability — Nevada is your market.

NEVADA.

Where Innovation Meets Opportunity.

COMPETITIVE TAX CLIMATE

- Nevada is known for its exceptional business climate

STRATEGIC LOCATION

- Situated in the heart of the Western U.S., Nevada neighbors the 5th largest economy in the world
- Less than a day's drive to five major U.S. ports serving the Pacific Rim
- Convenient access to key interstates offering efficient and direct routes to major cities and destinations nationwide

BUSINESS FRIENDLY-IT'S IN OUR DNA

- Streamlined regulations
- Low taxes-no corporate or personal income tax
- Supportive ecosystem for entrepreneurs, startups and corporations

SKILLED WORKFORCE

- With a track record of adapting to market shifts and embracing innovation, Nevada's workforce consistently meets evolving industry demands, driving economic growth and sustainability

UNIQUE ADVANTAGE

- Nevada is the only U.S. state that encompasses every facet of the lithium battery economy and life cycle, making it the only location in the world with a complete lithium supply chain
